Value="25"

Aside Tag
The side of content show
Design with CSS.

Script Tag

A web page can load JavaScript code from a file or from a URL. The code is executed when the browser loads the page. The script tag is used to include JavaScript code in a web page. It is placed in the head of the document.

```
<script type="text/javascript" defer="defer">
```

Document.write ("This is javascript
tag");
</script>

map and Area Tag

Article Tag
